Calculate the Surface Area of a Cone

1. \( \pi r^2 + \pi rl \)
2. \( \pi r^2 + \pi rl \)
3. \( \pi r^2 + \pi rl \)
4. \( \pi r^2 + \pi rl \)
5. \( \pi r^2 + \pi rl \)
6. \( \pi r^2 + \pi rl \)
7. \( \pi r^2 + \pi rl \)
8. \( \pi r^2 + \pi rl \)
9. \( \pi r^2 + \pi rl \)

Where:
- \( r \) is the radius of the base of the cone.
- \( l \) is the slant height of the cone.
- \( \pi \) is approximately 3.14159.

Note: The formulas above are the general formulas for calculating the surface area of a cone, where the surface area is the sum of the base area (\( \pi r^2 \)) and the lateral area (\( \pi rl \)).
